TA-8950 | MediaHub TLi with TruLink® Technology

Feature-Rich, Single-HDMI Connectivity Panel with dedicated “Made for iPod” AV+Charging port provides hotel guests an auto-sensing, auto-switching access point for plugging their iPod/iPhone and other portable media devices to the in-room HDTV and sound system. Guests use MediaHub TL to enjoy their own movies, videos, music, games, photos, and even business presentations through the in-room TV. TruLink technology provides IP control, manageability and usage reporting.

- All-in-one audio/video connectivity panel for connecting any portable media device to the in-room HDTV.
- Dedicated iPod port charges and plays audio and video files directly from Apple iPod/iPhone/iPad devices. Guest cable included.
- Truly plug-and-play, automatically senses guest device, switches TV to AUX HDMI input and switches TV back to regular programming when device is disconnected.
- Single-HDMI connectivity to the TV with Auto-Input-Switching and Auto-TV-Power-On via CEC specifications, compatible with hospitality's most popular TV brands.
- Internet-ready capabilities for remote management through SNMP network, firmware updates through FTP (updates 10,000 units in 30 seconds), and custom authentication options.
- Supports serial control for Auto-Input-Switching with hospitality TVs without CEC as well as hospitality's most popular VOD/PPV systems.
- Network-based guest usage reporting for property ROI analysis.
- Charges portable electronic devices through USB power port.
- Designed to mount in or under desks, nightstands or other casegoods.
- POE version available.
- Can be deployed worldwide.

TA-8950 | MediaHub TLi with TruLink® Technology

and VOD/PPV providers. For a list of compatible TVs and STBs in your region, please contact your TeleAdapt sales representative.

Auto-device-sensing detects new devices and switches between MediaHub inputs.

CEC-Compliant for Hospitality

When paired with CEC-Compliant HDTVs, MediaHub TLi will automatically turn on the TV upon device plug in, seamlessly switch the TV to the HDMI AUX TV input and switch back to regular TV programming upon unplugging the device.

USB Charging

USB 5V power socket provides a convenient way for charging portable electronics.

ETL, CE, CB, FCC, CE

Single-HDMI, Scaler Technology

Automatically upscales composite video signals up to 1920 x 1080p, while displaying native HDMI® digital video signals up to 1920 x 1080p. Also supports screen resolutions of up to 1280 x 1024 through the VGA input.

Network Manageability

Supports LAN remote manageability for TCP-IP enabled firmware updates, property-wide room-by-room monitoring and guest usage reporting.

Compatible with ANY HDTV

MediaHub TLi is also compatible with any TV with an available HDMI port and TV-switching is done manually using the remote control.

Auto-Input-Switching and Auto-Device-Sensing

MediaHub TLi will automatically sense when a guest plugs in a device and switch the TV to the TV's HDMI Input. Auto-Input-Switching is supported by hospitality's most popular TV makers
